

Your partner for
life-changing
medical solutions

At Alleima, our vertical integration is built around one goal: enabling innovation in life-changing medical devices. We deliver high-precision solutions for the most demanding applications, with precision manufacturing capabilities in:

Wire processing

- Fine-wire drawing
- Stranding, twisting and coiling
- Cut-to-length
- Stripping

Surface treatment

- Coating
- Core extrusion
- Electroplating
- Anodizing
- Electropolishing

Nitinol processing

- Grinding
- Braiding
- Shaping
- Joining

Laser processing

- Cutting
- Welding
- Drilling
- Marking

Why choose us?

- Structured stage-gate R&D process
- Direct engineer-to-engineer support
- Dedicated R&D resources and equipment
- In-house cleanroom assembly (class 7 and 8)

Advance with Alleima:

Collaborate with us from design to development and manufacturing of life-changing solutions to sense, measure, transmit, stimulate, catch or cut.
